

Date: September 17th, 2020

Attendees:

- Dr. Sowmya Sridharan
- Dr. Krishna Kadiyala
- Dr. Bingyang Wei
- Barbara Amoros
- Steve Priest
- Delaney Ochs
- Trieu Trong
- Marko Vulovic

Agenda:

- Introductions
- Elicit Requirements

Key Points:

- The project consists of a mobile application that can be used by everyone, not only patients. Users should not be forced to log in to access the app's contents.
- The primary purpose of the project is for users to be able to access information from the knowledge database.
- Logged-in patients should have a portal with their conditions and schedule appointments.
- The chat feature should be protected since all information there is private.
- The mobile application should follow the color and theme of the current website.

Next Steps:

- Research Sadguru and how their app works
- Compose vision and scope document
